TERMS & CONDITIONS

BIDDING: Each animal on which there are two bids will be sold to the highest bidder.

TERMS: Terms of the sale are cash. Checks are accepted and must be payable to Kimball Livestock Exchange LLC the day of the sale.

DISPUTES: The auctioneer will settle any bid disputes by declaring all off and reselling the animal in question.

SEMEN INTEREST: Retaining 1/3 semen interest on all bulls unless otherwise stated.

HANDLING: All animals will have health certificates. Those not Bangs vaccinated will be tested. All animals will be in good health and examined by our vet. A vet will be available sale day.

BREEDER'S GUARANTEE: All animals sold are guaranteed breeders by the owner. Any animal that has not proven itself a breeder within six months after date of sale, if in healthy condition, may be returned to seller at the buyer's expense. Should the animal fail to prove a breeder, the seller - at his option, may either replace the animal with another of equal quality in full settlement and satisfaction of all claims or give credit for the next year's sale at Christensen Charolais Ranch's sale. All complaints regarding breeding difficulties must be reported in writing to the seller within the time limit as specified above and in good condition. All cattle are registered or recorded in the American International Charolais Association and proper certificates will be furnished. Transfer of ownership will be completed by the seller.

ANNOUNCEMENTS: Announcements from the auction box will take precedence over the printed matter in this catalog.

LIABILITIES: All persons attending this sale do so at their own risk. Christensen Charolais Ranch LLC and Kimball Livestock Exchange LLC assume no liability, legal or otherwise, for any accidents which may occur.

SEALED BIDS: Early telephone bids can be given to Wade Christensen 605.730.1801 or Christina Christensen 605.680.1536

REMINDER: Special volume buyer discounts. A 5% volume discount will be given to any one family ranching operation purchasing 5 to 9 bulls. A 10% volume discount will be given to any one family ranching operation purchasing 10 bulls or more. There is a \$100.00 per head discount if you haul your own bull sale day.

Welcome to our 2nd Annual Christensen Charolais Ranch Production Sale!!

Welcome and thank you for joining us for the Second Annual Christensen Charolais Ranch Production Sale. What began as a belief in proven Charolais genetics, has grown into a program we are proud to stand behind and excited to offer to today's cattlemen and cattlemen.

Our confidence in the Eggleston Charolais program led our family to purchase numerous EC bulls for our commercial herd. Many of you recognize the EC/CY prefix from past catalogs, representing cattle tracing back to our shared cows with Egglestons. In 2002, Christina partnered with Eggleston Charolais through the purchase of 15 purebred registered Charolais cows—forming the foundation of the Christensen Charolais Ranch program you see today.

As a family, our passion for the Charolais breed runs deep. From an early age, our three sons have been invested in the ranch, working side by side with us and gaining hands-on experience in all aspects of the operation. They are the future of Christensen Charolais Ranch, committed to building on this program and developing a lasting legacy.

The Eggleston cow herd has long stood out for its maternal strength, soundness, and ability to produce long-sided, performance-driven cattle, traits that remain at the core of our breeding philosophy.

There has never been a more exciting time to be in the cattle business. Cattle prices are at historic highs, and genetics and bull power are key drivers of a record bottom line. Charolais-influenced cattle continue to bring top dollars due to their efficiency, growth, and feedyard performance—making Charolais bulls a smart, profit-driven investment.

We are grateful for the trust the Eggleston family has placed in our family and we remain committed to producing top-end genetics backed by dependable customer service. Our focus continues to be on the complete picture—quality, soundness, efficiency, growth, carcass value, and ease of use.

We invite you to join us on sale day as we offer a set of Charolais bulls built to perform and add value in today's cattle market. We appreciate your interest and support and look forward to seeing you at the Second Annual Christensen Charolais Ranch Production Sale.

Performance = Profitability

We invite you to visit and walk through the bulls at our ranch before sale day or come early to Kimball Livestock Exchange LLC the day of the sale to see the bulls and enjoy a complimentary beef lunch.

TSI EXPLANATION

Terminal Sire Index (TSI) The AICA Terminal Sire Index (TSI) is a formal method of combining Expected Progeny Differences (BWT, WWT, YWT, REA, HCW, MARB and FAT)-into one single value on which to base selection decisions. The TSI uses estimates of the genetic relationships between traits with an economic default value based on three year rolling USDA data.

The TSI represents a dollar index per terminal progeny produced for a bull in the AICA database, ranking them for profit potential. This dollar index is to be interpreted much like single trait EPD. For example, if Sire A's index is \$191.66 and Sire B's index is \$200.00, then we would expect Sire B's offspring to average \$8.34 more net return than Sire A's offspring.

VOLUME DISCOUNTS

Special volume buyer discounts. A 5% volume discount will be given to any one family ranching operation purchasing 5 to 9 bulls. A 10% volume discount will be given to any one family ranching operation purchasing 10 bulls or more. There is a \$100 per head discount if you haul your own bull sale day.

This bull was our pick and the high seller on the North Grove Charolais bull sale in 2024. To say we are super excited about this one is an understatement. We've calved out heifers the last two years that were bred to him. The calves came very easy and got up super fast like we have never seen before. He adds calving ease, length of body, performance, carcass, and a stellar EPD set. We think he is the best Tank son out there and best son of North Grove's New Standard donor that has produced 69 registered progeny. She's been a key cow in their program. If you're looking for calving ease with performance and carcass look at this sire group.

Lot 1's Grandam - EC Radiance 578 PLD

This is a Combat son that since the day he was born has just been an absolute stud. You don't want to miss out on this one. It is going to be hard to find a bull this complete. He is deep, big hipped, stretchy, smooth made bull, with a lot of eye appeal. He has 11 EPD's that rank in the top 30 percent of the breed. He started with an 88 pound birthweight and grew to an adjusted 840 pound weaning weight at a 117 ratio. His mother was a first calf Lock n Load daughter that was neat uddered and very pretty. She is my favorite female from 2023. It doesn't stop there either. This bull has an amazing granddam that Jamie flushed. She has produced three bulls that went on to work on purebred herds.

Chisum is an outcross sire out of Canada. We found him and we were intrigued and chose to use him in our AI program. Chisum sired calves have exceptional length of body, hip, eye appeal, and performance. Five bulls are sired by him and this is a solid group all around. He ranks in the top 30 percent of the breed for weaning, yearling, scrotal, docility, udder, teat, carcass weight, ribeye area, and total sire index (TSI).

This bull is long bodied and big hipped combined with 829# weaning weight and a ratio of 115. A bull that will push the performance being out of Chisum and a no-miss power cow family. His mother has a 113 weaning weight ratio on two calves. Starting out like this, she has a bright future. His granddam is one of the best cows at our place, boasting 118 weaning weight ratio on 7 calves! A cow that has made some of the best performance genetics in the EC herd.

Lot 18's Grandam - EC Bella 428 PLD

This son of Chisum has a lot of length and power. He's got top end performance and it shows in his EPD's with top 6 percent in the Charolais breed for weaning weight and top 4 percent for yearling weight. He's out of a dam that has had a calf every year until she was 10 years old and she had a beautiful udder. She also raised the high seller in Eggleston's 2020 production sale, EC Reveal, going to Lindskov's LT Ranch.

Bull Development

These bulls were developed on a high-roughage ration including earlage, sorghum silage, prairie hay, alfalfa, and a protein supplement from J&R Feeds. They were weaned in September and developed in a large yard environment that encouraged plenty of exercise. All bulls received spring and fall vaccinations and had free-choice salt and mineral throughout development. Our program emphasizes longevity, sound feet and legs, breeding soundness, and disposition, producing bulls built to work and hold up over time. We are confident and excited to offer this set of bulls to you.

Kinsman is a bull we immediately were some of the first people to get semen on. We later found out he was not sold and bought part of him. Kinsman is one of those bulls that is very complete across the board and checks a lot of boxes. Kinsman blends together performance, carcass, maternal, tremendous feet, good disposition, length, with a smooth and attractive look. He's also backed by awesome cows that most have produced herd sires. He ranks in the top six percent weaning, yearling, milk, maternal, carcass weight, ribeye area, marbling, and total sire index (TSI).

Here's a very long sided, lengthy bull. One that will make calves stretchy and heavy at weaning. His dam has a weaning weight ratio of 105 on four calves. She has put some nice females in the replacement pen.

This bull is long, deep bodied, and thick. A half brother sold in Eggleston's 2024 sale for \$11,500. His brother is now a herd sire for Brent Charolais in Kansas. He's out of a very nice Down n Dirty daughter.

Ultrasound - Act. REA 13.30, Act. IMF% 2.40

This is a son of Silver City that we're really excited about. We bought him off Eggleston's 2023 bull sale. We chose him for his make up, muscle, performance, carcass traits, disposition, shape, and extra depth of body. He ranks 12 EPD's in the top 20 percent of the breed. He also had performance data to back it up. He ratioed 107 for weaning, 105 for yearling, and 124 for IMF. He has gained attention in the purebred world. We also sold daughters on our Fall sale and one of them was the high selling lot. His dam is also an awesome Buzz daughter working for Thomsen Charolais.

Here's a herdsire prospect by our 965 sire. He is very thick, deep bodied, big topped and big hiped. He is one we believe would be a candidate on heifers. He ranks 1 percent for both calving ease and birth weight. He combines that with a 76 pound birth weight. He was born that light and grew to a 738 pound weaning weight at 103 ratio. He ranks 11 EPD's in the top 35 percent of the breed. His dam has a very nice udder. We just calved his half sister and she has one of the nicest udders of all our heifers and has small teats. We believe that it is going to be hard to find a bull more complete than this one.

Here's a very nice red bull that is lengthy, has depth of body, and is big hipped. He had an impressive 803# weaning weight at a 112 ratio. He ranks 14 EPD's in the top 35 percent of the breed. Numbers and quality you will not find with too many other red bulls. He's out of a very nice and good uddered Buzz daughter. His mother raised a son that went to Small Livestock, Idaho. She also produced a daughter that is a top candidate for our bred heifers that we sold a pick of the herd on the National Charolais sale. His granddam was just as great and Jamie thought he could have flushed her.

RR Silver City is an impressive sire Jamie purchased from Roman Ranches, Oregon. He was selected out of 100 bulls for marbling, performance, shape, structure, and eye appeal. His mother was an amazing outcross cow family for the Romans. His EPD profile is used throughout our herd. He ranks top 25 percent in 11 EPD traits including 1 percent for marbling. Sons have been top in previous sales for carcass traits.

Lock n Load was Jamie's choice and high selling lot at Aschermann production sale in 2013. He has proven to do everything like adding maternal, disposition, growth, carcass traits, longevity and overall do-ability. He was quickly picked up by Bovine Elite and sired many calves since. With so much success with him we had to go back and incorporate him with our AI program. You will be impressed with his son's length of body, mass and overall performance.

Grandview is an interesting and unique individual. Grandview combines two elite individuals. He has become an elite herd sire and has been widely used across the breed. His dam has become one of the most, if not the most, talked about and sought after females in the Charolais breed. She was the top selling female at the legendary M6 dispersal for \$36,000 and then a couple years later was the pick of the Grand Hills Cattle cowherd. She has had many popular bulls and heifers. We believe Grandview is her best son. He excels in performance and carcass. He recorded a 150 IMF ratio as a yearling! Sons are topping sales all around the country. We just started calving daughters of him and they are exceptional females with a great feminine look and nice udders. We unfortunately lost Grandview last fall and limited semen is available. Don't miss a chance to capitalize on superior genetics with these sons.

Here's a flashy looking Grandview son that's thick, deep bodied and big hipped. He also has a great EPD set behind him. He weighed in at weaning with 835# and a 116 ratio. With very little semen left and not many Grandview sons out there, this is one you should not look past. He's backed by an incredible dam that we think so much of. She has two sons working in purebred herds, Soreide Charolais in North Dakota and the other working for Lewis Charolais and Strnad Charolais in Kansas. One sold for \$28,000 on the 2021 Eggleston sale. She has an impressive 108 weaning weight ratio on 7 calves.

This bull is very intriguing. He has a very interesting pedigree with being out of Redemption and the M6 New Germaine 484 cow. She has produced many herd sires and is one of the most used and known cows in the Charolais breed. She has 96 progeny and one of them being Grandview. He was used for his impressive amount of length, hip, performance, and carcass qualities. This sire group will add performance and carcass.

This is a New Redemption son who has depth of body and a big hip. He started smaller at an 88 pound birthweight and then went on to have a weaning weight ratio of 105. He's out of a nice Buzz daughter.

Commercial Steers

We sent 79 home-raised CharX steers to finish on feed at Montezuma, KS in January of 2025. They had an average calving date of April 10, 2024 and were killed on July 10, 2025. At 15 months of age (450 days old), they weighed 1525# and had an average carcass weight of 976#.

3.4# ADG. 64% yield. Avg quality grade Choice. Avg yield grade 3.18.
 Avg Back Fat 0.65. Avg REA 15.48. Avg Marbling Score 5.20.

The U.S. cattle inventory is at its lowest level in 75 years. With the current beef shortages, the efficiency of steers in the current 2026 market is a critical factor in addressing persistent beef shortage. We are confident that the efficiency of these steers emulates the need for quick turn around for lean meat production.

We are excited about this bull. Jamie chose him for calving ease, marbling, length, and performance. We used him on heifers with great success for 4 years. We have calved out daughters for the last 3 years and to say we were impressed is an understatement. They have plenty of milk with a neat bag and small teats. If you're looking for calving ease with a big punch look at this sire group. You will not be disappointed.

This Reagan son was purchased from Dybdal Charolais in Nebraska. He's a bull that makes them deep bodied and thick. He also was very easy to calve out of and should add plenty of calving ease.

This is a deep made son of Reagan. He would for sure be a candidate for heifers. He has a stacked pedigree. His dam is a full sister to New Redemption 219. His granddam is the well known and one of the most popular cows in the Charolais breed, M6 New Germaine 484. She has raised many herd sires and has 96 registered progeny.

This Long Distance son will be a very good one to add length, depth of body, and hip. His granddam was a great cow bought from Prairie Cove Charolais in Canada.

Thank You!

Our family feels incredibly blessed to have the long-standing friendship of the Egglestons. We are eternally grateful for the trust and faith they placed in us by allowing the EC herd to become part of our own story. It was a decision we did not take lightly, yet we never hesitated to say yes to such a once-in-a-lifetime opportunity.

We are especially thankful for Jamie's support throughout this transition. His guidance, willingness to help, and continued involvement—whether stopping by to walk through cattle, helping picture the bulls, or lending a hand on working days—mean a great deal to our family.

We also want to extend a heartfelt thank you to our family, friends, and everyone who lends a hand throughout the year. Your support keeps us moving forward, and we couldn't do what we do without you.

A special thank you goes to Kyle, who is absolutely integral to our success and keeps the ranch steady no matter how many directions the rest of us are headed. We are also grateful to CJ for joining our team this year and stepping in to assist Kyle during the busiest times. Their teamwork and commitment make all the difference.

We would also like to thank Prairie View Vet Clinic and Dakota Feed & Grain for their continued support and care. Their expertise and dedication help ensure our bulls are at their very best come sale day, and we truly appreciate all they do for our program.

Here's a very nice son of Benaiah and the 234 cow. He's deep bodied and thick made. He had an adjusted weaning weight of 756 pounds. His dam produced three herd sires. She has an impressive 108 weaning weight ratio on 8 calves!

Charolais Cross Calves

Consistent results: For two years straight, a herd of 200 steers and heifers sired by CCR bulls averaged **800 lbs** by early February. These calves were born starting in April, showing impressive growth for their age. No creep.

This bull was our pick and the high seller on the North Grove Charolais bull sale in 2024. To say we are super excited about this one is an understatement. We've calved out heifers the last two years that were bred to him. The calves came very easy and got up super fast like we have never seen before. He adds calving ease, length of body, performance, carcass, and a stellar EPD set. We think he is the best Tank son out there and best son of North Grove's New Standard donor that has produced 69 registered progeny. She's been a key cow in their program. If you're looking for calving ease with performance and carcass look at this sire group.

This is a son of Silver City that we're really excited about. We bought him off Eggleston's 2023 bull sale. We chose him for his make up, muscle, performance, carcass traits, disposition, shape, and extra depth of body. He ranks 12 EPD's in the top 20 percent of the breed. He also had performance data to back it up. He ratioed 107 for weaning, 105 for yearling, and 124 for IMF. He has gained attention in the purebred world. We also sold daughters on our Fall sale and one of them was the high selling lot. His dam is also an awesome Buzz daughter working for Thomsen Charolais.

86 Heifer Pairs

These heifers were AI'd to our herd sire **NGC COMBAT 317L ET** (EM993789) that we purchased from North Grove Charolais, Grove City, MN, in 2024. We have used COMBAT extensively on Commercial Heifers, Charolais Heifers, and Charolais Cows. We have been extremely pleased with the COMBAT babies. COMBAT is the whole package with calving ease, growth, carcass, and especially vigor. Heifer pairs have been worked. Vet sheet will be available day of sale. The heifer pairs will be hauled to Kimball Livestock Exchange LLC and sold through the ring on the day of the Bull Sale. Once purchased, they will need to be loaded out by the buyer(s) and taken to their new home.
